

FCC:I recently bought a Chevy with XM available in it. Up until that time I really did not listen to the radio any more because of ALL the commericals. It feels like, 15 minutes per hour of talk or music and 45 minutes of commericals, so I stopped listening to free radio. Then I got XM! What a difference. There is actually a variety of music, programs and news, I love it and I'm listening to radio once again. Their traffic reports are AWESOME! I can't say enough about how comprehensive their reports really are! PLEASE do NOT allow the Nat'l Assoc. of Broadcasters to stop ANY part of XM. I want you to know another purpose for XM. My Dad is suffering with Macular Degeneration, he has lost his sight. He can't drive, or do most things. I got him XM in our home and he now has something to do and be entertained by. He LOVES the Olde Time Radio programs, and many many other stations that XM offers. PLEASE, I don't know what he would do if "they" were allowed to take XM away from him! I'm sure he isn't the only blind person that is finding some kind relief from having XM. Thank you,
Melinda Jensen
